DATE CALCULATIONS AND NAVIGATION PATHS

Once you load the data, we need to Prepare the data.

a. Prepare Calculations of Year, Month, Day fields and also the related Navigation path

b. Create a Few more Calculations – Target Sales, Min Sales, Max Sales, Middle Range Sales.

1. Right click> calculation> type expression> validate> Set Name as 'Order Year'

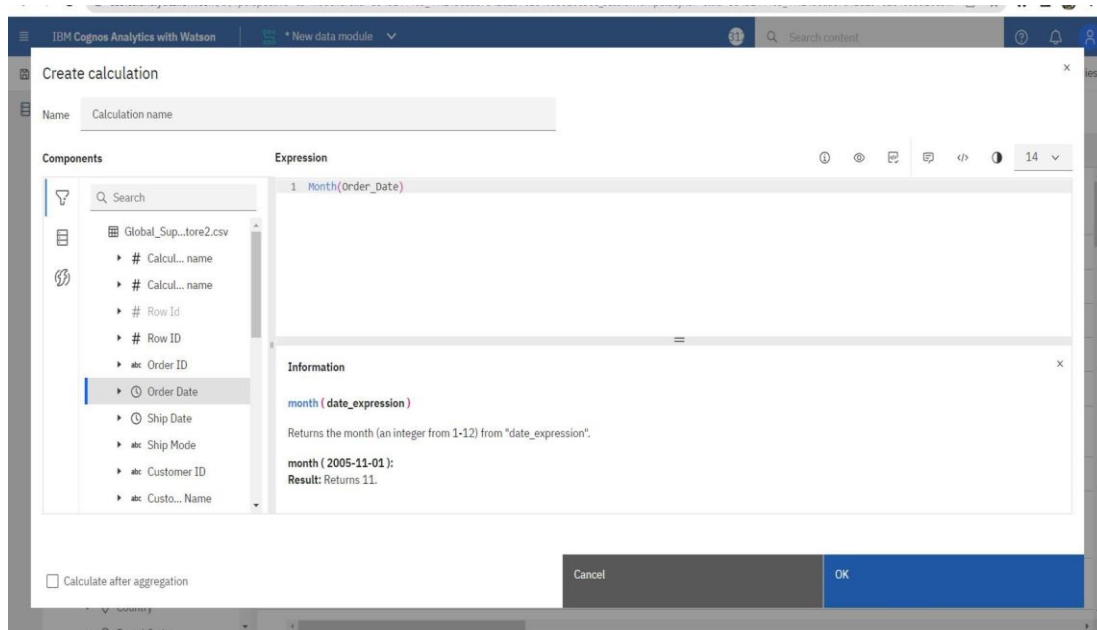

2. Similarly, 'OrderMonth', 'OrderDay' and 'All'

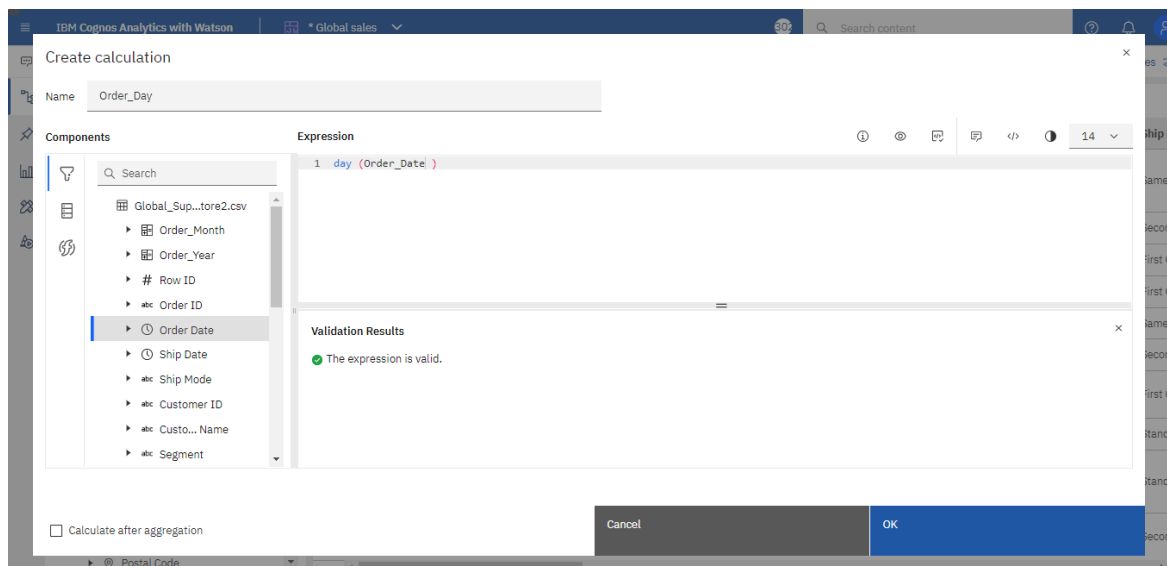

OrderYear -> Year (Order_Date)

OrderMonth -> Month (Order_Date)

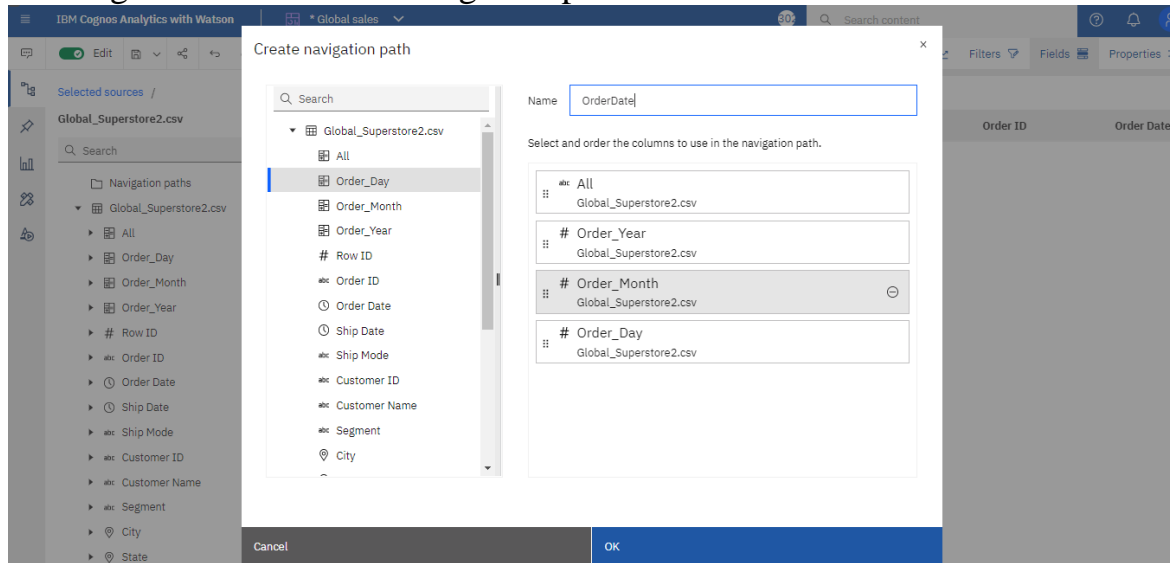

OrderDay -> Day (Order_Date)

All -> All

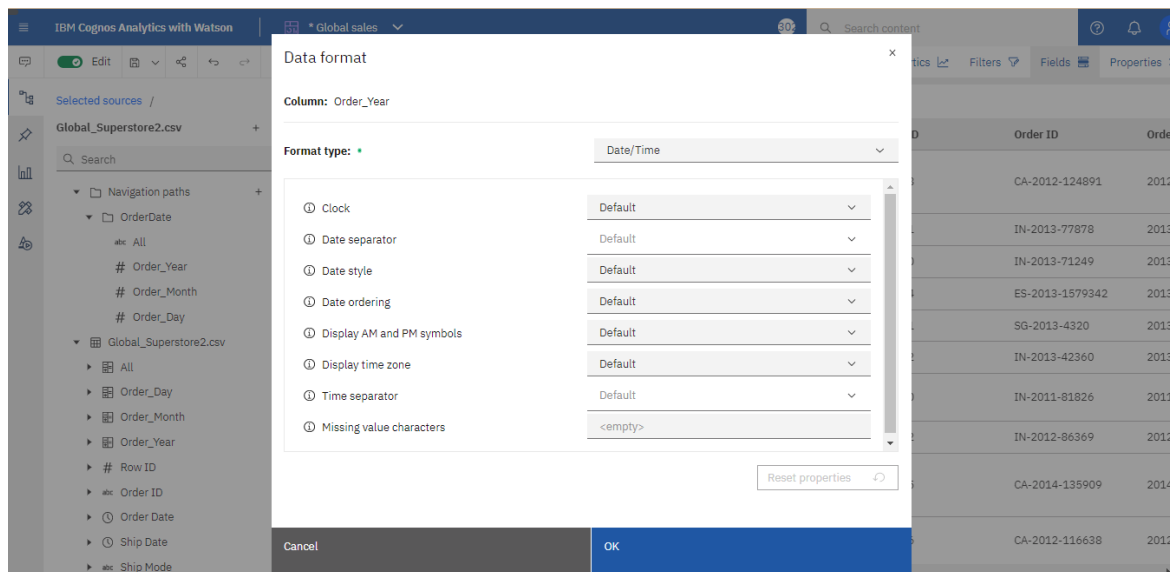

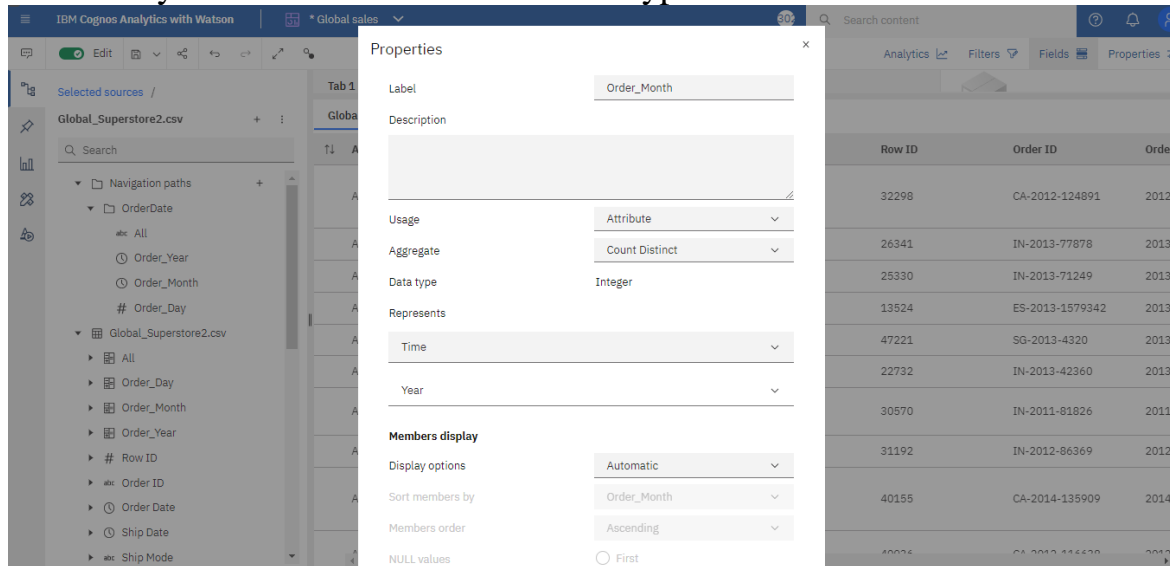

3. Right click on create navigation path

4. Data format> Date/Time

5. Properties> Usage-> Attribute
 Aggregate-> Count Distinct
 Data Type-> Integer
 Represents-> Time, (Year, Month, Day Respectively)
 Display Options-> Show Members
 This way it becomes a Numerical data Type

6. Hence calculations for day, month and year are completed.

Once you load the data, we need to Prepare the data.

- Prepare Calculations of Year, Month, Day fields and also the related Navigation path
- Create a Few more Calculations – Target Sales, Min Sales, Max Sales, Middle Range Sales.**

7. Similarly, calculations for Target sales, Min sales, Max Sales and Middle range sales are done

Min sales-> minimum (Sales)
